Dear Colleague

Community Pharmacy Invitation to participate in NHS Tayside Immunisation Scheme

Expressions of interest are requested from those pharmacies that would like to participate in the NHS Tayside Immunisation Scheme 2019/20. Pharmacies that have provided this service in the past, and wish to do so again, are requested to complete the attached form and return by e-mail to myself as above, or faxed to 01382 632498. If pharmacies participated previously and will not be doing so this year I would also be grateful if they could let me know.

The aim of the scheme is to provide advice, information, and immunisation from Community Pharmacies throughout Tayside.

Immunisations offered through this service are:

- Seasonal Influenza Vaccine - occupational immunisation for NHS Tayside staff.
- Hepatitis B immunisation - occupational immunisation
- Human Papilloma Virus (HPV) - vaccination to young people who have missed via the schools programme and at-risk adults
- Meningococcal ACWY – vaccination to young people who have missed via the school programme and those under 26 years going to university for the first time
- MMR - vaccination to young people who have missed via the school programme
- Td/IPV - vaccination to young people who have missed via the school programme

The scheme should be available in all areas in which there is an identified need for such a service. Priority groups for particular attention include NHS Tayside staff, young people, at-risk adults and students.

For all pharmacists wishing to provide immunisation via the NHS Tayside Immunisation Scheme including those pharmacists who have previously been trained to administer vaccines, there is a requirement for annual CPR update training. Therefore, pharmacists who intend to participate in the pharmacy immunisation scheme this coming year must undertake CPR update training appropriate to their learning needs. Pharmacists are asked to confirm that they are competent to undertake this service.

Vaccines are administered under the terms of a Patient Group Direction (PGD) which must be signed by the immuniser prior to immunisation.

Vaccines for national immunisation programmes are centrally procured. Discussions with National Procurement have enabled pharmacy contractors to be supplied with vaccine through this facility in order to provide this service. Participating Pharmacies will receive supplies of vaccine via the Vaccine Services, Pharmacy Department, Ninewells Hospital. To order supplies please complete the form attached to this letter, Appendix 2 – Vaccine Order Form. A weekly delivery service can be arranged if necessary.

I would be grateful if you could complete and return the attached 'Confirmation of Participation' form by **Friday, 10th May, 2019**, if you wish to provide immunisations under the NHS Tayside scheme this

year, whether as a previous participant or as a new one. It would be helpful if you could also complete the order form for influenza vaccine for this years NHS Staff programme and return it to us along with your confirmation.

Kind regards

Moyra
