

HRPM

High Risk Pain Medicines Patient Safety Programme

Managing Pain - A Time for Change...

Pain and Surgical Team Development Sessions

The Pain and Surgical team are delighted to host a series of development sessions to help the Pharmacy team deliver high quality care to our patients on High Risk Pain Medicines (HRPM).

The sessions will run approximately twice monthly over the next 7 months and will be recorded so can be accessed at the time or retrospectively. This will build up a library of resource that can be accessed in the future by other colleagues or new joins.

The programme of events has the support of the Clinical pharmacy leads and you are encouraged to engage to support your own learning needs and help Pharmacy deliver on our contribution to the HRPM agenda.

The first set of events are noted below. Specific objectives for each session will be available and circulated in advance. Sessions will be approximately 45 mins.

Look forward to seeing you!

Pain & Surgical Team
