- Patients from outside of the EEA/Switzerland **cannot obtain emergency supplies of medication via community pharmacy.** Consider referral to local general/private practice or via UCSF prof-prof route.

## COMMUNITY PHARMACY SERVICES – A Reminder During Tourist Seasons

### Healthcare in Scotland for Holidaymakers from Overseas (Factsheet)

<https://www.nhsinform.scot/publications/healthcare-in-scotland-for-holidaymakers-from-overseas-factsheet>

Holidaymakers' eligibility to receive free healthcare while in Scotland will depend on their individual circumstances. However, access to emergency treatment is free until the overseas patient is stabilised.

Patients who run out of medicines should see a GP who will decide if the patient can register as a temporary resident to allow an NHS prescription (if appropriate), otherwise a private prescription (if appropriate).

### Unscheduled Care

Community pharmacy contractors may provide patients, registered (or temporarily) with a medical practice in Scotland, with NHS prescribed medicines, appliances and ACBS products when the patient's prescriber is unavailable and when it is clinically appropriate to make the supply. This is to ensure continuity of care for patients and easing the strain on our colleagues in primary care and Out of Hours services.

### Pharmacy First

[Overall Service - PCA2020\(P\)13](#)

The following persons are eligible for the service:

- a person registered with the Defence Medical services (even if they are a visitor to Scotland),
- a person registered on a permanent basis with a GP Practice in Scotland,

- a person registered on a temporary basis with a GP Practice in Scotland (unless they are a visitor to Scotland),
- a person who lives in Scotland,
- a person who is a gypsy or traveller in Scotland, or
- a person who is an asylum seeker in Scotland or
- a dependent of an asylum seeker in Scotland.

The following persons are not eligible:

- a visitor to Scotland

*(A visitor is defined as someone who is away from their normal place of residence and who intends to stay in Scotland for less than 3 months. A person who is registered with a GP Practice in Scotland on a temporary basis and who is a visitor to Scotland under the 2020 Directions is not eligible to receive the service.)*

[Minor Eye Conditions PCA\(O\)\(2020\)18 and PCA\(P\)\(2020\)24](#)

Eligibility:

- Individuals who are registered with a GP practice in Scotland, or who live in Scotland, are eligible to use NHS PFS subject to certain exceptions for visitors to Scotland.
- Visitors to Scotland are excluded from accessing the service, however pharmacists will still be able to provide general help and advice to these patients as well as providing medication by OTC sale (if appropriate).
- Visitors presenting initially at the pharmacy with an emergency eye problem should be informed that they are entitled to free NHS eye care until they are stabilised:  
<https://www.nhsinform.scot/care-support-and-rights/health-rights/access/healthcare-for-overseas-visitors#tourists-and-holidaymakers>.

Alternatively, if the problem is not deemed an emergency, the patient can be signposted to an optometry practice for advice about their eye condition. The patient will be appropriately triaged and managed. If an eye examination is deemed appropriate by the optometrist and the patient resides outside of the UK, and is therefore not eligible for a free NHS funded General Ophthalmic Services examination, a private fee may be payable.

### Emergency Hormonal Contraception

[PCA \(P\) \(2015\) 20](#)

Public Health Service

- The free supply of emergency hormonal contraception (EHC) is available to any female client aged 13 years or over. The service must be provided by the pharmacist in person.
- A pharmacist who chooses not to supply EHC on the grounds of religious, moral or ethical reasons must treat the matter sensitively and advise the client on an alternative local source of supply (another pharmacy, GP or sexual health service) available within the time frame for emergency hormonal contraception treatment to be effective (within 120 hours of unprotected sexual intercourse).
