

The role of the pharmacist in opioid dependence treatment

Wednesday, 14th May

7:00pm - 8:30pm

Camurus are pleased to invite you to the second in our series of scientific seminars for 2025. An online seminar for healthcare professionals and other relevant decision makers working in opioid dependence treatment.

We are bringing together experts in the field to discuss the role of the pharmacist in different settings and how they can help to support services and patients with opioid dependence. They will be highlighting some of the challenges faced and how they can be addressed.

Agenda

Professor Catriona Matheson (Professor in Substance Use, University of Stirling):

Catriona will chair the seminar and provide an overview of how the involvement of pharmacists in opioid dependence treatment has changed and developed over time

Dr Sarah Donaldson (Lecturer & Pharmacist Researcher, University of Dundee) & Professor Andrew Radley (Professor in Public Health Pharmacy, University of Dundee): Sarah and Andrew will give a public health perspective on the role of the pharmacist, including, for example, management of Hepatitis C and the provision of naloxone

Michael McAuley (Clinical Services Manager, Turning Point):

Michael will discuss the clinical role of pharmacists providing assessment and treatment of dependence alongside care for physical and mental health conditions

Dr Natalie Weir (Pharmacist & Post-Doctoral Researcher, University of Strathclyde): Natalie will talk about the clinical role of community pharmacists providing an accessible service with a focus on holistic care and stigma

Agenda subject to change.

Who Should Attend?

This promotional online seminar is organised and funded by Camurus for healthcare professionals in the UK. This seminar will contain information about prescription only medication.
