

Shortage Guidance

The Medicines Shortage Log may be useful to access at any stage of the shortage process. The log provides details surrounding medicines shortages that are being actively managed. It lists the expected duration of the shortage (where this information is available) and outlines any work to address the shortage that is ongoing, including any advice to the service that has been issued. The log is updated weekly and can be accessed via the NHS Intranet (<https://intranet.nhsh.scot.nhs.uk/Org/DHS/Pharmacy/MedicinesShortages/Pages/default.aspx>).
