

COMMUNITY PHARMACY LANARKSHIRE

PHARMACY FIRST PLUS NEWSLETTER

MAY 2026

Prescribing Data – May 2026

The **Pharmacy First Plus service** is available across 57% of NHS Lanarkshire's Community Pharmacy network. In May there were 83 active prescribers.

Locality	No. IPs
Airdrie	14
Bellshill	11
Camglen	18
Clydesdale	15
Coatbridge	10
East Kilbride	13
Hamilton	13
Motherwell	9
North Locality	13
Wishaw	13
Total	129

Have you moved to a new pharmacy site or healthboard?

You must notify the NHS Lanarkshire Pharmacy Admin team of any changes to your workplace/practice or if you leave the organisation:

- If you move to another contractor code within NHS Lanarkshire you must notify Pharmacy Admin of the new contractor code to ensure the IP organisational data base is accurate. NHS Facilitation must also be notified to ensure your NHS mailbox, Clinical Portal and Emergency Care Summary access reflects this.
- If you move to another sector of practice and/or another health board, you must notify Pharmacy Admin and destroy any prescribing pads issued by the health board (an email from your line manager confirming pads have been shredded and disposed of into confidential waste is sufficient). Similarly, any prescriber joining the health board must apply for an NHS Lanarkshire prescribing number and must not use any other number issued by previous employers. NHS Facilitation must also be notified to ensure your NHS mailbox, Clinical Portal and Emergency Care Summary access reflects this.

Your NHS Lanarkshire prescribing number and prescription pad is for use within NHS Lanarkshire only. These pads cannot be used / annotated by another prescriber.

Skin

There were 229 items issued under the BNF chapter Skin; let's take a look at Skin conditions and reflect/align the below May prescribing to the [West of Scotland Formulary](#)

Eczema / Contact Dermatitis	
Emollient Medium Weight Creams	Epimax origianl cream Zerobase 11% cream Cetraben cream QV Cream
Emollient Medium Weight Gels	Epimax isomol gel Zerodouble gel
Emollient Medium Weight Oat base	Epimax oatmeal cream Zeroveen cream
Emollient Medium Weight Ointments	White soft paraffin 50% / Liquid paraffin 50% ointment Zeroderm Ointment Hydromol ointment Epimax paraffin free ointment (only for use when paraffin free preparation required)
Emollient Medium Weight Specialist Initiation Only	Emollin Adex These should not be initiated under the PF+ service
Urea containing emollients	imuDERM Flexitol 10% urea cream (For skin lesions on the hands and feet.) Flexitol 25% urea heel balm (For treatment for rough, dry and callused heels and feet when 10% urea cream has failed)
Soap substitutes / showering/bathing	Bath and shower emollient preparations should be reserved for situations where the use of regular emollient preparations is not sufficient. In most cases regular emollient preparations are suitable for use as bath additives and soap substitutes. Zeroderm Ointment QV Gentle wash (<i>specialist initiation therefore should not be initiated under PF+ service</i>) Dermol 500 lotion (<i>Restricted to use only when skin is infected or if infection is a frequent complication (e.g. folliculitis or secondary infection of eczema). Not for prolonged use unless clinically indicated.</i>)
staphylococcal skin infection with inflammatory skin condition	Fusidic acid 2% cream
Psoriasis	
Mild to moderate psoriasis	Exorex lotion
Mild scalp psoriasis	Coal tar shampoo

	Capasal Therapeutic shampoo Cocois ointment
Moderate psoriasis	Coal tar in Yellow soft paraffin and coal tar 6% (Psoriderm)
Pruritus <i>Emollients should be considered first line treatment, see emollient choices in the Eczema section of the formulary. Anti pruritics should be considered when an emollient has been ineffective in relieving symptoms.</i>	
Topical Treatment	Menthol 1% Aqueous cream Aqueous calamine cream (itch associated with chickpox) Crotamiton 10% cream (itch associated with scabies)
Oral Treatment	Cetirizine Loratidine Chloramphenamine Hydroxyzine
Corticosteroids	
Mild	Hydrocortisone 1% cream / ointment Antimicrobial Hydrocortisone acetate 1% / Fusidic acid 2% cream Antifungal Hydrocortisone 1% / Clotrimazole 1% cream Timodine cream Hydrocortisone 1% / Miconazole 2% cream
Moderate	Clobetasone 0.05% cream/ointment (30g most cost effective, if 100g required then Betamethasone 0.025% cream/ointment is more cost effective)
Potent	First Line: Betamethasone 0.1% Second Line: Flucinolone acetonide 0.025% or Mometasone 0.1% Antimicrobial Betamethasone valerate 0.1% / Fusidic acid 2% cream Antifungal Betamethasone dipropionate 0.064% / Clotrimazole 1% cream
Very Potent	Clobetasol 0.05% cream/ointment

Items issued in May 2026

Skin items highlighted below

****While many areas highlighted in green are appropriate, prescribers are reminded to prescribe generically and not by brand.**

Item	Quantity
PHENOXYMETHYLPENICILLIN 250MG TABLETS	68

Additional Considerations for Skin Prescribing

- Most emollients (apart from white soft paraffin 50%/liquid paraffin 50%) may be used as soap substitutes (hand washing and in bath/shower) by firstly wetting the skin, washing with the cream or ointment, then rinsing off. Epimax products are considered body washes rather than soap substitutes so as to avoid contact with the eyes.
- All emollients (paraffin-based and paraffin-free) carry a risk of severe burns. Patients should avoid smoking or naked flames, as emollients can transfer to clothing, bedding, and dressings, where they dry, build up, and act as an accelerant if ignited. Though not flammable on skin, dried residues increase fire speed and intensity.
- Similar risks may occur with other skin products used widely or in large amounts. Clothing and bedding should be changed daily; washing at high temperatures reduces but does not remove residue.
- General considerations on formulations:
 - Creams – less greasy, easier to apply, preferred cosmetically; useful for weeping lesions.
 - Gels – suitable for face and scalp.
 - Lotions – cooling; good for moist or hairy areas; alcohol-based lotions may sting on broken skin.
 - Ointments – greasy, less likely to sensitise; best for chronic dry lesions.
 - Absorption – creams and lotions absorb faster than ointments or gels.
- Emollients with antiseptics should only be used in patients with infected eczema.

What quantities to prescribe?

- Quantities are based on twice daily application for 1 week in adults:

Body area	Non-corticosteroid cream/ointment
Face	15 to 30g
Both hands	25 to 50g
Scalp	50 to 100g
Both arms	100 to 200g
Both legs	100 to 200g
Trunk	400g
Groins and genitalia	15 to 25g

- Quantities are based on single daily application for 2 weeks in adults:

Body area	Corticosteroid cream/ointment
Face and neck	15 to 30g
Both hands	15 to 30g
Scalp	15 to 30g
Both arms	30 to 60g
Both legs	100g
Trunk	100g
Groins and genitalia	15 to 30g
