

**NATIONAL PATIENT GROUP DIRECTION FOR URGENT PROVISION OF MEDICINES,
APPLIANCES AND ACBS PRODUCTS v32 (July 2025)**

This is Medicines Look-up List v2.2 (April 2026) and should be used with PGD v32

The list below is ordered A-Z for all drugs in the BNF and BNF App, and are listed generically. The left-hand column shows the generic drug name and the right-hand column has information on whether the drug can (GREEN) or cannot (RED) be supplied under the PGD. Where a drug is only allowed for certain indications, or only certain formulations are allowed, the entry will be listed as AMBER with information on what specifically can be supplied. While this list indicates whether supply is possible or not under the PGD, application of this PGD requires the use of professional judgement, where you must consider the needs of the patient in front of you and the consequences of making or not making a supply. Where a supply cannot be made under the PGD, pharmacists should consider how to best support the patient in obtaining continued supply of their prescribed medication. This could mean referring on to another health care professional within an appropriate timeframe.

Note: this list does not include Appliances or ACBS products, please refer to Schedule 17 and Schedule 18 of PGD v32 and reference to relevant parts of the BNF, BNFC and/or Scottish Drug Tariff
